

Microsoft Windows Hosted SharePoint Services - Business Benefits

Cobweb Hosted SharePoint provides you with improved communication and empowered teams, which have easy access to information.

Improved team productivity

Cobweb SharePoint Hosting helps you connect people with the information and resources they actually require for their business. Users can create team workspaces, coordinate calendars, organise documents and receive important notifications and updates. Mobile users can use the offline synchronisation capabilities; they can view and update SharePoint task lists, blogs, and other information directly from any Windows Mobile, WAP, CHTML, or XHTML-enabled device.

Document management for content integrity

Now with the enhanced document management capabilities, which include the option to activate required document checkout before editing, the ability to view revisions to documents and restore to previous versions, and the control to set document and item level security, Cobweb SharePoint Hosting can help ensure the integrity of documents stored at various sites.

Process and workflow platform

Cobweb SharePoint Hosting enables customers and partners to implement a wide range of workflow-enabled applications including the ability to;

- Create workflows using development tools such as Microsoft Visual Studio and Microsoft Office SharePoint Designer 2007
- Associate workflows with content types, lists or libraries
- Initiate workflows automatically whenever items are added or modified, or initiate manually from the Action menu
- Receive notification when a workflow requires interaction by the user

Collaborative environment

Cobweb SharePoint Hosting is easy to manage and easy to scale, enabling IT departments to deploy a collaborative environment with minimal administrative time and effort.

Reduce the complexity of securing business information

Cobweb SharePoint Hosting provides IT departments with advanced administrative controls for increasing the security of information resources, while decreasing cost and complexity associated with site provisioning, site management and support.

Sophisticated controls for securing company resources

IT departments can now set permissions as deep down as the document or item level, and site managers, teams, and other work groups can initiate self-service collaborative workspaces and tasks within these preset parameters.

Robust storage capabilities

Cobweb Hosted SharePoint supplies workspaces with document storage and retrieval features, including check-in/check-out functionality, version history, customer metadata, and customisable views.

24/7 UK based Customer Support

We have a passion for customer service and ensure that our support services are easy to access and jargon free. Our customer support team are available 24 hours a day 7 days a week to provide telephone and online application support.
